Life Protected Cleaner
Water Soluble Matrix

The future of cleaning technology

Introducing a breakthrough in cleaning technology with GV Health's new Life Protected Cleaner (LPC). LPC water-soluble sheets, dissolve in water in seconds to create a high-performance cleaning solution for environmental surfaces. Developed with an innovative surfactant formulation based on GV Health's new Water Soluble Matrix Technology (WSM) which is set to revolutionise the cleaning industry.

Simply dissolve sheets in water...

36 sheets inside each pack

Smarter

Easy dosing

With the cleaning formula already pre-measured in each LPC sheet, users no longer have to worry about measuring and pouring the right amount. This saves time and eliminates the risk of over-use or under-use, which can result in ineffective cleaning or waste. **Dissolves at least 10x faster** than all other solid surface cleaning products, even in cold water. Safe and easy to dispense – no splash risk with the solid sheet and no need for manual pump dispensers. Suitable for use with cleaning machines.

High performance

This multi-purpose cleaning formulation enables a high level of cleaning, removing dirt, grease and tacky residues, saving both time and labour costs.

At least x4 less storage space

LPC sheets are easy to use and store, making them a convenient choice for people on-the-go. LPC sheets reduce storage space required by at least 4 times vs liquid concentrate cleaners.

Versatile use & application

Compatible for use with spray bottles, spray, jet or foaming nozzles, automated cleaning equipment, and mops, the LPC sheets can be used with a broad range of application methods.

Multiple applications

LPC's multiple applications mean that it can easily replace a number of existing cleaning products, making it a more storage efficient, cost effective and sustainable alternative.

Up to 90L of solution from 1 pack

LPC's compact design means that one pack can make up to **36L** of ready-to-use solution for hard surface cleaning and **90L** for floor cleaning.

Application	Usage rate		Total ready to use solution volume per SKU (litres)	
	Litres per sheet	Sheets per litre	Pack	Case
Hard Surfaces	1	1	36 L	**1,728 L**
Floors	2.5	0.4	90 L	**4,320 L**

The Science & Technology

LPC is a revolutionary cleaning technology, developed in GV Health's state of the art laboratory facilities. Based on new chemistries, test methods and manufacturing processes, LPC is designed to meet the complex, varied and rapidly evolving needs of facility hygiene operations.

Water Soluble Matrix

LPC is based on GV Health's Water Soluble Matrix (WSM) technology platform.

- Up to **50%** reduction in chemical use compared to other solid cleaning products.
- Reduced PPE - Safer formula means only gloves are required
- Safer and easier to handle due to a **95.5%** reduction in weight compared to liquid pre-concentrate cleaners.
- A safer, pH neutral surfactant-based formula, kinder to materials and compatible with a wide range of surfaces.
- Leaves no surface residues, unlike most solid effervescent cleaning products.

Significantly more Sustainable

- **82.4%** reduction in carbon footprint of inner packaging compared to preconcentrate cleaners.
- **34%** reduction in inner packaging waste (by weight) compared to preconcentrate cleaners*.
- Cardboard inner packaging reduces use of plastic.
- **77%** reduction in the carbon footprint and cost associated with transportation and storage compared to pre-concentrate cleaners.
- Manufactured with **30% renewable energy**.

Hard Surfaces
Wipe (Foam, Spray or Soak)

Floors
Mop or Machine compatible

Developed for use in healthcare and professional cleaning, LPC is already used in the NHS, HMP, hospitality and other sectors to ensure the best outcomes in hygiene and cleaning.

Code	Product	Pack Size	Dilution / Use
LPC036	Life Protected Cleaner	Pack of 36 sheets (12 layers, 3 sheets per layer)	1 sheet in 1 litre for hard surfaces 1 sheet in 2.5 litres for floors
LPCCSB	Life Protected Spray Bottle	Unit	750ml
